

Jeian Jasper S. Obelidor

Amazon Connect Support Engineer | Quezon City, Philippines | 09272530395 | obelidor.jeianjasper@gmail.com

[linkedin.com/in/jeianjasper/](https://www.linkedin.com/in/jeianjasper/) | github.com/jeianjaz | jeianjasper.me

TECHNICAL SKILLS

Languages: Python, Javascript, SQL, Bash, Java, HTML/CSS

Cloud & DevOps: AWS (EC2, S3, VPC, IAM, RDS, Lambda, CloudFront, ALB, ASG, CloudWatch), Terraform, Docker, Kubernetes, Helm, GitHub Actions, Git, Linux, Prometheus, Grafana, AlertManager, Trivy

Networking & Protocols: OSI Model, TCP/IP, Subnetting, Routing & Switching, LAN/WAN concepts, Network Topologies, DNS, DHCP

WORK EXPERIENCE

IT Intern - United Laboratories Inc. (UNILAB) | Sept 2025 - Feb 2026 *Mandaluyong City, Philippines*

- Migrated 3,000+ physical vehicle records into a centralized cloud database, making the fleet operations fully paperless.
- Validated and tagged 2,200+ records during a new Vehicle Management Application launch, ensuring data was accurate so the system went live with no downtime.
- Conducted rigorous data quality and access control validation checks to ensure compliance with digital database management protocols.

PROJECTS

AutoTier — Self-Healing 3-Tier Infrastructure on AWS

- **Network Design:** Architected a secure 3-tier network stack featuring public and private subnets across multiple Availability Zones using 18 Terraform files.
- **Traffic Management:** Implemented **Application Load Balancers (ALB)** and strict EC2 Auto Scaling groups to optimize internal network traffic routing.
- **Troubleshooting & Recovery:** Configured automated self-healing network nodes triggered by CloudWatch alerts and Lambda, cutting **Mean Time To Recovery (MTTR) down to 80 seconds**.

CloudDeck: Automated & Observable Network Architecture

jeianjasper.me

- **Secure Access:** Provisioned 7 core cloud services utilizing AWS VPC components, managing secure inbound/outbound rules via Security Groups and NACLs with zero console clicks.
- **Monitoring & Security:** Built live infrastructure dashboards using **Lambda APIs and automated security checks (Checkov)** to flag network vulnerability gaps before deployment.

DockerLens: Network Traffic Observability Stack

- **Metrics & Routing:** Configured a local containerized network stack running **Prometheus and Grafana** to track connection latency and error rates.
- **Incident Response:** Established alert rules routed through **AlertManager** to instantly notify administrators of service drops or latency bottlenecks.

EDUCATION & CERTIFICATIONS

Quezon City University - Bachelor of Science in Information Technology | Aug 2022 - June 2026

- Latin Honors: **Cum Laude (GWA: 1.30)**
- **AWS Cloud Practitioner Essentials** – Amazon Web Services (Official Certificate) | 2026
- **Introduction to Cybersecurity** – Cisco Networking Academy (Credly Verified)
- **Advanced Software Engineering Simulation** – Walmart Global Tech / Forage
- **Introduction to Cloud** - Datacom / Forage
